B.Tech, Mechatronics Engineering

Address : NO 62 LAKSHMI PANDIAN ILLAM MADHA KOIL 3RD CROSS STREET,
KATTANGULATHUR

Summary

Final-year Mechatronics Engineering student at SRM Institute of Science and Technology (CGPA: 8.18) with hands-on experience in manufacturing, maintenance, quality, industrial automation, and technology-driven process improvement through internships at Royal Enfield, UCAL Limited, Witzenmann India, and Kyungshin Industrial Motherson. Strong in analytical thinking, problem solving, project execution, and developing practical solutions to improve industrial operations. Seeking to apply engineering knowledge, data-driven thinking, and cross-functional collaboration to drive operational excellence and continuous improvement.

Education

SRM IST-Kattankulathur B.Tech · Mechatronics Engineering	2027 CGPA - 8.18/10
SIVANANDA SARASWATHI MATRICULATION HIGHER SECONDARY SCHOOL Class XII - STATE BOARD · MPC · KATTANKULATHUR	2023 Percentage - 80.33%
SIVANANDA SARASWATHI MATRICULATION HIGHER SECONDARY SCHOOL Class X - STATE BOARD · KATTANKULATHUR	2021 Percentage - 100%

Experience

UCAL Limited Link Maintenance Department · Trainee · Internship	Dec 2024 - Jan 2025 Chengalpattu, India
Completed internship in the Maintenance Department at UCAL Limited, gaining hands-on exposure to automotive manufacturing processes including casting, CNC machining, and tool making. Developed understanding of preventive maintenance practices and industrial workflows.	
Witzenmann India Pvt. Ltd. Link Production Engineering Department · Trainee · Internship	Jun 2025 - Jun 2025 Chrompet, India
Completed internship in the Production Engineering Department at Witzenmann India Pvt. Ltd., contributing to the “ Electrical and Pneumatic Dojo Setup ” project. Assisted in developing a training workstation for industrial automation systems, gaining practical exposure to electrical and pneumatic components, along with production engineering processes.	
KYUNGSHIN INDUSTRIAL MOTHERSON LIMITED Quality Department · Trainee · Internship	Dec 2025 - Jan 2026 Padappai, India
Completed an internship in the Quality Department at Kyungshin Industrial Motherson Pvt. Ltd. (KIML), Padappai. Gained exposure to quality inspection procedures, manufacturing standards, and quality assurance practices in automotive wiring harness production. Developed understanding of quality control, defect identification, and manufacturing quality management. Received a stipend of Rs. 18,000.	
Royal Enfield Maintenance Engineering Development · Intern · Full-Time	Jun 2026 - Jul 2026 Oragadam, Chennai
- Working with Maintenance Engineering Development team - Supporting preventive and predictive maintenance activities - Assisting breakdown analysis - Studying machine reliability - Developing RE SensorIQ for intelligent industrial sensor recommendation - Working with industrial sensors, automation and maintenance analytics	

Projects

RE SensorIQ – Intelligent Industrial Sensor Recommendation Platform Web Link	Jun 2026 – Present
Royal Enfield · Java, Groq API, UI&UX, and Google Images	Industrial Development
- Developed AI-powered industrial sensor recommendation platform for manufacturing applications. - Integrated Groq AI for intelligent sensor recommendations. - Implemented analytics dashboard and PDF report generation. - Technologies: Java, Electron, Groq API, SQLite, HTML, CSS, JavaScript. https://re-sensoriq.netlify.app/	
Electrical and Pneumatic Dojo Setup Link	Jun 2025 – Jun 2025
Witzenmann India Pvt. Ltd. · AutoCAD, FluidSim & Blender	Pneumatics and Electrical
- Designed and implemented a Dojo-based training setup for practical learning - Integrated Electrical, Pneumatic, and Electropneumatic systems - Used Blender for design and FluidSIM for simulation - Created a hands-on environment to simulate real industrial applications - Focused on improving practical skills, system understanding, and troubleshooting	
DIY Pen Plotter	Jan 2024 – May 2024
SRMIST · Arduino, GRBL Plotter	Mechatronics
- Developed a 2-axis CNC pen plotter (X-Y) using Arduino - Controlled motion using stepper motors for precise positioning - Implemented accurate plotting on paper using pen mechanism - Demonstrated concepts of CNC systems, motion control, and automation	
MaintenancelQ – Intelligent Maintenance Management & Analytics Platform	Jun 2026 – Present
Royal Enfield · JavaScript, HTML, CSS, Chart.js, jsPDF, ExcelJS	Industrial Automation
- Developed a desktop-based CMMS (MaintenancelQ) using Electron.js, Express.js, SQLite, JavaScript, HTML, and CSS. - Implemented KPI dashboards with MTTR, MTBF, downtime, maintenance cost, machine availability, and trend analytics. - Developed a professional reporting module supporting PDF, Excel, CSV, and print-ready reports. - Applied modular architecture, reusable components, centralized validation, and responsive UI principles for maintainability and scalability.	

Certifications

C PROGRAMMING - Professional Level Link	Mar 2024
PURDUE University	
Introduction to Data Engineering and Big Data Link	
HCL GUVI · kHu3i79316q49X3jv3	
Introduction to Internet of Things Link	May 2026
IIT, Kharagpur	

Skills

Programming Languages: Python, C++
Design and Simulation Tools: AutoCAD, Solidworks, Blender, Ansys, Tinkercad
Technical Skills: CNC Machine Operations, Electrical and Pneumatic Setup, Industrial Maintenance, Manufacturing Process, Mechanical Assembly, Tool & Die Making Basics, Software Troubleshooting
Tools and Technologies: Operating Systems & Installation

Languages

English [Professional Working Proficiency], Hindi [Elementary Proficiency], Japanese [Fundamental Proficiency]
